ROOTED IN TRADITION

KOLKATA IS MORE THAN OUR LOCATION,
IT'S THE FOUNDATION OF OUR IDENTITY.

Tandhan Denim emerges from Kolkata, a city where artistry and industry have long been intertwined. Drawing on this legacy, we have established a modern denim manufacturing facility dedicated to precision, scale, and sustainability.

DESIGNED FOR THE FUTURE

With an annual capacity of 18 million meters and the ability to recycle 1 million litres of water each day, Tandhan Denim operates Eastern India's largest zero-liquid-discharge facility. Strategically positioned near Kolkata, we ensure shorter lead times and seamless connectivity to global markets.

15 lac meters/month

2 to 3 days to Bangladesh

Largest ZLD facility in Eastern India

INDIGO PERFECTED AT SCALE

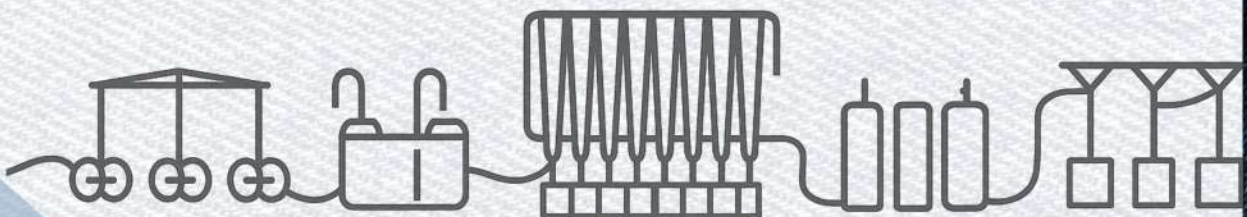

MORRISSON ROPE DYEING

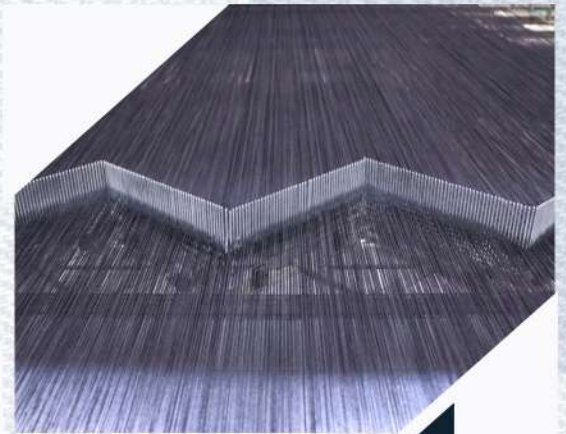

Delivers deep, uniform indigo penetration and durable shade performance.

Ensures consistent results across multiple washes and fabric weights.

The world's longest continuous rope dyeing range, engineered for scale with precision.

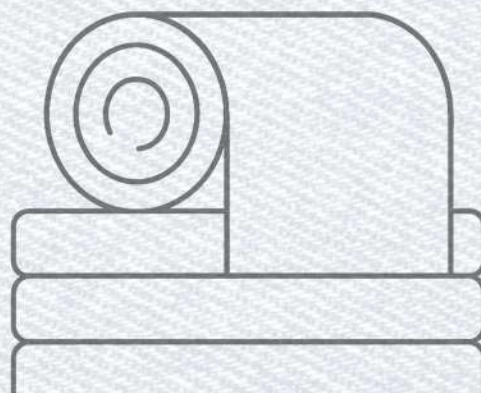

WEAVING SPEED & PRECISION

TOYOTA AIRJET LOOMS

High-speed weaving engineered for precision and versatility. Ensures defect-free fabrics with excellent dimensional stability, optimised to cover the full denim spectrum — from featherlight shirting to heavy-duty denims.

Delivers precision, consistency & scale producing premium fabrics with world-class efficiency.

QUALITY AND TESTING

TECHNOLOGY THAT BUILDS TRUST

At Tandhan Denim, every fabric is tested to meet global benchmarks of durability, comfort, and performance. Our laboratories are equipped with advanced machines to ensure consistency, reliability, and international compliance and quality parameters like the American 4 point system.

PILLARS OF SUSTAINABILITY

WATER

Eastern India's largest zero-water-wastage denim facility.
1 million litres recycled daily through Zero Liquid Discharge (ZLD).

CHEMICAL

Aligned with ZDHC, OEKO-TEX®, and REACH protocols. Strict monitoring ensures safe chemistry and eco-friendly production.

ENERGY

Energy-efficient machinery designed to lower consumption. Continuous investment in cleaner technologies to reduce carbon footprint.

COMPLIANCE

Aligned with international standards to ensure compliance at every stage.

FABRIC SPECTRUM

Tandhan Denim offers a wide spectrum of fabrics — from authentic rigids to advanced stretch, innovative knits, and sustainable blends. Our portfolio goes beyond breadth to deliver true depth: premium denim crafted with superior hand feel, engineered comfort, and timeless character, supported by efficient rope dyeing that achieves shade ranges from 2.5% indigo to the deepest 7% darks.

Designed for durability and style, every collection is built to meet the evolving

07 needs of global markets.

DENIM STORIES

Our collections combine timeless denim heritage with modern innovation. Each story is designed to address a unique market and brand need — from authentic rigids to advanced blends, performance stretch, and sustainable innovations.

MARKET & PARTNERSHIPS

Since our inception in 2023, Tandhan Denim has been growing steadily, establishing a strong presence in the domestic market while gradually expanding into major international manufacturing hubs. Our close proximity to Bangladesh, one of the world's largest apparel production centres enables us to connect more efficiently with global brands and shorten the journey from mill to market.

Client Segments:

Global and domestic- Brands
Garment Manufacturers
Trading and Buying Houses.

GLOBALLY EXPANDING FOOTPRINT

PARTNER WITH US

As a young and agile mill, Tandhan Denim is built to serve modern market needs with speed, flexibility, and responsibility.

Our commitment goes beyond fabric supply — we deliver solutions that help our partners grow.

AGILITY

Short lead times
and fast delivery.

FLEXIBILITY

MOQs tailored for
brands and traders
alike.

INNOVATION

Seasonal capsules,
design inputs, and
R&D.

SUSTAINABILITY

Responsible
choices embedded
across operations.

CONSISTENCY

Reliable Quality,
batch after batch.

PARTNERSHIP

Transparent,
service oriented
approach.
